GROWTH ENGINE STRATEGY & DEMAND ARCHITECTURE

Motivated B.Tech student in Electronics & Communication Engineering with specialization in Artificial Intelligence and Machine Learning (AIML). Skilled in Python, JavaScript, web development, and software development with a strong interest in AI-driven applications, problem-solving, and full-stack technologies. Quick learner with experience in teamwork, leadership, and event coordination, capable of adapting effectively in dynamic environments.

GROWTH RECORD & CAMPAIGN VELOCITY

AI-Based Attendance System | Software & AI Project | 2024 - Present

- %² Developed a face-recognition attendance system using Python and OpenCV.
- %² Automated attendance tracking to improve efficiency and reduce manual effort.
- %² Applied computer vision concepts for real-time face detection and recognition.

Portfolio Website | Software & AI Project | 2024 - Present

- %² Built a responsive personal portfolio using HTML, CSS, and JavaScript.
- %² Showcased projects, technical skills, and personal achievements through an interactive interface.
- %² Optimized the design for compatibility across multiple devices and screen sizes.

Machine Learning Mini Projects | Software & AI Project | 2024 - Present

- %² Worked on beginner-level machine learning projects using Python libraries.
- %² Explored concepts such as data preprocessing, model training, and predictive analysis.
- %² Gained hands-on experience in implementing basic ML workflows.
