EDUCATION

B.Tech in Electronics & Communication Engineering (AIML)
University Institute

Expected Graduation: 2027
University Institute

Higher Secondary Education
University Institute

Completed 12th Standard with Science Stream.
University Institute

Secondary Education
University Institute

Completed 10th Standard.
University Institute

LEADERSHIP & ACTIVITIES
University Institute

• Participated actively in sports and team-based activities during school and college.
University Institute

• Developed teamwork, coordination, and communication skills through collaborative environments.
University Institute

• Strong interest in calisthenics, football, and continuous self-development.
University Institute

SKILLS & TOOLS

• Python
• JavaScript
• C++
• HTML
• CSS
• Web Development
• Git & GitHub
• VS Code
• Machine Learning Basics
• Software Development
• Problem Solving
• Team
• Collaboration

PROFILE SUMMARY

Motivated B.Tech student in Electronics & Communication Engineering with specialization in Artificial Intelligence and Machine Learning (AIML). Skilled in Python, JavaScript, web development, and software development with a strong interest in AI-driven applications, problem-solving, and full-stack technologies. Quick learner with experience in teamwork, leadership, and event coordination, capable of adapting effectively in dynamic environments.

WORK EXPERIENCE

AI-Based Attendance System

Software & AI Project | 2024 - Present

- Developed a face-recognition attendance system using Python and OpenCV.
- Automated attendance tracking to improve efficiency and reduce manual effort.
- Applied computer vision concepts for real-time face detection and recognition.

Portfolio Website

Software & AI Project | 2024 - Present

- Built a responsive personal portfolio using HTML, CSS, and JavaScript.
- Showcased projects, technical skills, and personal achievements through an interactive interface.
- Optimized the design for compatibility across multiple devices and screen sizes.

Machine Learning Mini Projects

Software & AI Project | 2024 - Present

- Worked on beginner-level machine learning projects using Python libraries.
- Explored concepts such as data preprocessing, model training, and predictive analysis.
- Gained hands-on experience in implementing basic ML workflows.

PROJECTS & ACHIEVEMENTS

AI-Based Attendance System

- Developed a face-recognition attendance system using Python and OpenCV.
- Automated attendance tracking to improve efficiency and reduce manual effort.
- Applied computer vision concepts for real-time face detection and recognition.

Portfolio Website

- Built a responsive personal portfolio using HTML, CSS, and JavaScript.
