CORE COMPETENCIES

- Python
- JavaScript
- C++
- HTML
- CSS
- Web Development
- Git & GitHub
- VS Code
- Machine Learning Basics

EDUCATION

B.Tech in Electronics & Communication Engineering (AIML)
University Institute

Expected Graduation: 2027
University Institute

EXECUTIVE SUMMARY

Motivated B.Tech student in Electronics & Communication Engineering with specialization in Artificial Intelligence and Machine Learning (AIML). Skilled in Python, JavaScript, web development, and software development with a strong interest in AI-driven applications, problem-solving, and full-stack technologies. Quick learner with experience in teamwork, leadership, and event coordination, capable of adapting effectively in dynamic environments.

PROFESSIONAL EXPERIENCE

AI-Based Attendance System

Software & AI Project | 2024 - Present

- Developed a face-recognition attendance system using Python and OpenCV.
- Automated attendance tracking to improve efficiency and reduce manual effort.
- Applied computer vision concepts for real-time face detection and recognition.

Portfolio Website

Software & AI Project | 2024 - Present

- Built a responsive personal portfolio using HTML, CSS, and JavaScript.
- Showcased projects, technical skills, and personal achievements through an interactive interface.
- Optimized the design for compatibility across multiple devices and screen sizes.

Machine Learning Mini Projects

Software & AI Project | 2024 - Present

- Worked on beginner-level machine learning projects using Python libraries.
- Explored concepts such as data preprocessing, model training, and predictive analysis.
- Gained hands-on experience in implementing basic ML workflows.

KEY TECHNICAL PROJECTS

AI-Based Attendance System

- Developed a face-recognition attendance system using Python and OpenCV.
- Automated attendance tracking to improve efficiency and reduce manual effort.
- Applied computer vision concepts for real-time face detection and recognition.

Portfolio Website

- Built a responsive personal portfolio using HTML, CSS, and JavaScript.
- Showcased projects, technical skills, and personal achievements through an interactive interface.
- Optimized the design for compatibility across multiple devices and screen sizes.

Machine Learning Mini Projects

- Worked on beginner-level machine learning projects using Python libraries.
- Explored concepts such as data preprocessing, model training, and predictive analysis.
- Gained hands-on experience in implementing basic ML workflows.
