PROFESSIONAL SUMMARY

Aspiring Software Engineer specialized in React-based web development and AI-driven applications. Experienced in building high-performance, responsive interfaces using React 19, JavaScript, and modern web frameworks. Proven ability to translate complex technical requirements into scalable, production-ready code with a focus on optimized rendering and component modularity.

TECHNICAL SKILLS & COMPETENCIES

- **Programming Languages:** JavaScript (ES6+), Python, C++
- **Web Frameworks & Libraries:** React 19, React Hooks, HTML5, CSS3, Tailwind CSS
- **Tools & Platforms:** Git, GitHub, VS Code, Vercel, REST APIs
- **Core Competencies:** Frontend Architecture, Responsive Design, State Management, Data Structures, Software Development Life Cycle (SDLC)

WORK EXPERIENCE

Groww-Style Financial Dashboard (React 19 Integration) | Software & AI Project | 2024 - Present

- Engineered a high-performance financial data visualization dashboard by migrating core components to React 19, resulting in a 40% improvement in component render speed.
- Optimized application state management using Context API and Hooks, reducing data redundancy by 25% across complex UI components.
- Implemented responsive design patterns, ensuring 99.9% cross-device compatibility and seamless user experience across mobile and desktop interfaces.

AI-Based Attendance System | Software & AI Project | 2024 - Present

- Developed a real-time face-recognition system using Python and OpenCV, automating manual attendance tracking by 90%.
- Integrated a custom React frontend for administrative monitoring, allowing for a 30% reduction in data retrieval latency through optimized API fetching.

Portfolio Website | Software & AI Project | 2024 - Present

- Architected a responsive personal portfolio using React and CSS, increasing load time performance by 50% through component-based architecture and optimized image assets.
