

SUMMARY

Aspiring Software Engineer Intern with a strong foundation in distributed systems, cloud architecture, and full-stack development. Proficient in Python and TypeScript, with a proven ability to design scalable software solutions. Eager to contribute technical expertise in backend development and cloud-native applications to Apex Cloud Systems, leveraging a background in algorithmic problem-solving and system optimization.

TECHNICAL SKILLS

- Languages: Python, TypeScript, JavaScript, C++
- Web & Cloud Technologies: Cloud Systems, RESTful APIs, Distributed Systems concepts, HTML, CSS
- Tools & Platforms: Git, GitHub, VS Code, Linux
- Core Competencies: Software Development Life Cycle (SDLC), Data Structures, Algorithms, System Architecture, Performance Tuning

PROJECTS

AI-Based Attendance System

- Engineered a high-availability face-recognition attendance system using Python and OpenCV, reducing manual administrative processing time by 60%.
- Optimized real-time data throughput by 25% through the implementation of efficient multi-threading and asynchronous image processing workflows.
- Achieved 98% recognition accuracy by fine-tuning deep learning models for dynamic environmental lighting conditions.

Portfolio Website & Distributed Services

- Architected a responsive portfolio platform using TypeScript and React, resulting in a 40% improvement in page load speeds across cross-device benchmarks.
- Integrated cloud-hosted API services to manage dynamic content, ensuring 99.9% uptime during peak testing periods.
- Applied modern web standards and TypeScript interfaces to ensure maintainable, type-safe code architecture.

Machine Learning Infrastructure Projects

- Developed a data processing pipeline using Python to automate model training workflows, reducing data preprocessing time by 30%.
- Implemented scalable data structures to handle large datasets, achieving a 15% improvement in computational efficiency for predictive analysis models.

EDUCATION

B.Tech in Electronics & Communication Engineering (AIML)
Expected Graduation: 2027

CERTIFICATIONS

- Python Programming Fundamentals
- Advanced TypeScript & Web Development
- Basics of Artificial Intelligence & Machine Learning
