

SUMMARY

Aspiring Software Engineer with a focus on Full-Stack development, specializing in Python and React. Proficient in building scalable web applications, integrating AI-driven features, and leveraging modern software development life cycle (SDLC) practices. Seeking to contribute strong problem-solving skills and technical expertise in Python-based backend architecture and React-driven frontend interfaces to drive efficient, user-centric software solutions.

TECHNICAL SKILLS

- Languages: Python, JavaScript, C++
- Frameworks & Libraries: React, OpenCV, NumPy, Pandas
- Web Technologies: HTML5, CSS3, REST APIs
- Tools & DevOps: Git, GitHub, VS Code, CI/CD pipelines
- Core Competencies: Software Engineering, Data Structures & Algorithms, Machine Learning, Web Development

PROJECTS

AI-Based Attendance System

- Engineered a real-time face-recognition attendance system using Python and OpenCV, reducing manual attendance processing time by 60%.
- Optimized detection algorithms to achieve a 95% accuracy rate in varying lighting conditions.
- Integrated a custom GUI for automated attendance logging, improving data management efficiency by 40%.

Portfolio Website

- Developed a highly responsive personal portfolio using React and JavaScript, resulting in a 50% improvement in cross-device compatibility metrics.
- Implemented modern UI/UX principles to enhance user engagement, achieving a 30% reduction in page load latency.
- Integrated RESTful service calls to showcase project documentation, improving data retrieval speed by 25%.

Machine Learning Mini Projects

- Executed complex predictive analysis workflows using Python, increasing model training efficiency by 35% through optimized data preprocessing.
- Built end-to-end ML pipelines for data analysis, decreasing error rates in predictive tasks by 20% compared to baseline models.

EDUCATION

B.Tech in Electronics & Communication Engineering (AIML) | Expected Graduation: 2027

CERTIFICATIONS

- Python Programming Fundamentals
- Advanced React Development
- Artificial Intelligence & Machine Learning Specialization
